**BACKGROUND ABOT COP21 and COP22 THE 22nd CONFERENCE OF PARTIES-----**

The COP21 Paris agreement in 2015 acknowledges the need for further negotiation and refinement. Consequently, COP 22 is significant as the place where the Paris framework will be further refined, and gaps in the existing agreement filled in order to ensure a safe future climate. Already, the SABSTA meetings in Bonn have started to discuss the provisions of the Paris agreement that require further elaboration. This on-going negotiation is particularly important for Africa, given that the continent continues to bear the brunt of climate change while contributing the least to the phenomenon.

It is thus in Africa's interest to ensure that the Paris framework is consolidated into a binding and enforceable agreement which addresses the issues that concern the continent. In the lead up to Paris, these issues included the need to ensure balanced focus on adaptation and mitigation, limiting global warming to below 1.50C, ensuring adequate means of implementation, as well as maintaining

the CBDR principle. The Paris framework does not conclusively address most of the continent's concerns, and it is recognized that COP 22 represents an opportunity to advance the development of the Paris framework. Source African Union Commission (AUC).
